

BANK OF GEORGIA

Bank of Georgia located in Newnan, GA features approximately 9,000 sq. ft. of Petersen Snap-On standing seam metal roofing panels to provide key architectural branding elements. Both straight and radiused 24 gauge panels were finished in PAC-CLAD® Kynar 500® Medium Bronze.

“The metal roof and prominent barrels are key to the visual branding,” said Jefferson Browne, president of Jefferson Browne Design Studio, Peachtree City, GA. “The client didn’t want a typical bank ‘monument’ design. We agreed on a hometown—almost residential—look and feel that would be inviting and comfortable yet would be architecturally inspiring.”

The Snap-On roof was installed by A.L. Nash Roofing Company, Gay, GA. The Petersen distributor was Commercial Roofing Specialties, College Park, GA.

Southtree Enterprises, Tyrone, GA was the general contractor on the project.

Petersen, a Carlisle company, manufactures PAC-CLAD architectural metal cladding systems in multiple gauges of steel and aluminum. PAC-CLAD products include hidden- and exposed-fastener wall panels, standing seam roof panels, flush- and reveal-joint wall panels, vented or solid soffit panels, perforated metal, coil and flat sheet, composite panels, column covers, plus fascia and coping. All are available in a Kynar-based 70% PVDF Fluoropolymer coating in 46 standard colors and 16 wood grain finishes that include a 30-year finish warranty. Most colors meet LEED requirements and are rated by the Cool Roof Rating Council. Custom colors and weathertightness warranties are offered. BIM and CAD documents are available for most products. Founded in 1965, Petersen’s facilities are located in Illinois, Georgia, Texas, Maryland, Arizona and Washington. For information on the complete line of Petersen’s PAC-CLAD metal

products call 800-PAC-CLAD, visit pac-clad.com or write to info@pac-clad.com.
