

STREAMWOOD POLICE DEPARTMENT

Petersen metal column covers and beam wraps played a key role in the design of the new City of Streamwood Police Department building in Streamwood, IL. The building is part of a municipal campus that includes the Village Hall and Veterans Memorial.

According to Raymond Lee, principal in charge, Sente Rubel Bosman Lee Architects, Deerfield, IL, “Even though the structure was larger, the goal was to keep the new police department building ‘small’ so that it didn’t overshadow the adjoining Village Hall. Complementing the Village Hall without overpowering it was a very important objective. Our design response was to utilize simple, clean lines on the new building and create a distinguished, welcoming entrance that would be the main feature of the building.”

The design utilized Petersen’s PAC 1000C Series Column Covers and Beam Wraps finished in Clear Anodized. In addition, approximately 27,000 sq. ft. of PAC-CLAD Tite-Loc metal roofing panels finished in Musket Gray were used on the roof.

“The columns have a lot of visual impact,” according to Lee, “and they are quite durable. We also used beam wraps to interface with the column covers to tie the look of the front of the building together. The design brings your eye to the entrance rather than the massiveness of the building.”

Installation of the Petersen column covers, beam wraps and metal roofing was done by All American Exterior Solutions, Lake Zurich, IL. The general contractor on the project was Mortenson Construction, Minneapolis.

Petersen, a Carlisle company, manufactures PAC-CLAD architectural metal cladding systems in multiple

gauges of steel and aluminum. PAC-CLAD products include hidden- and exposed-fastener wall panels, standing seam roof panels, flush- and reveal-joint wall panels, vented or solid soffit panels, perforated metal, coil and flat sheet, composite panels, column covers, plus fascia and coping. All are available in a Kynar-based 70% PVDF Fluoropon coating in 46 standard colors and 16 wood grain finishes that include a 30-year finish warranty. Most colors meet LEED requirements and are rated by the Cool Roof Rating Council. Custom colors and weathertightness warranties are offered. BIM and CAD documents are available for most products. Founded in 1965, Petersen's facilities are located in Illinois, Georgia, Texas, Maryland, Arizona and Washington. For information on the complete line of Petersen's PAC-CLAD metal products call 800-PAC-CLAD, visit pac-clad.com or write to info@pac-clad.com.
