

MCDANIEL'S YACHT CLUB

The new metal roof on the McDaniel's Yacht Club, Northeast, MD utilizes 4,000 sq. ft. of Petersen's 24 gauge SNAP-CLAD Metal Roofing Panels finished in Berkshire Blue. The building is highlighted by an observation tower that overlooks the docks.

Installation of the Petersen system was completed by Tri-State The Roofers, Wilmington, DE. According to project manager Ron Sanna, "The roof included dormers and numerous hips and valleys for architectural emphasis. It was cold winter work but the job turned out great and has become quite a landmark in the marina."

The building was designed by Design Works, Incorporated, Towson, MD. General contractor for the project was CBL Contracting, Havre de Grace, MD.

Petersen, a Carlisle company, manufactures PAC-CLAD architectural metal cladding systems in multiple gauges of steel and aluminum. PAC-CLAD products include hidden- and exposed-fastener wall panels, standing seam roof panels, flush- and reveal-joint wall panels, vented or solid soffit panels, perforated metal, coil and flat sheet, composite panels, column covers, plus fascia and coping. All are available in a Kynar-based 70% PVDF Fluoropon coating in 46 standard colors and 16 wood grain finishes that include a 30-year finish warranty. Most colors meet LEED requirements and are rated by the Cool Roof Rating Council. Custom colors and weathertightness warranties are offered. BIM and CAD documents are available for most products. Founded in 1965, Petersen's facilities are located in Illinois, Georgia, Texas, Maryland, Arizona and Washington. For information on the complete line of Petersen's PAC-CLAD metal products call 800-PAC-CLAD, visit pac-clad.com or write to info@pac-clad.com.
