SHOPS AT HIGHLAND VILLAGE

Located 29 miles northwest of Dallas, The Shops at Highland Village is an upscale, mixed-use lifestyle center consisting of approximately 350,000 sq. ft. of retail and restaurants and 32,000 sq. ft. of office space. The architectural theme for the 16-building destination development is Texas Hill Country. The site design provides for a central gathering spot and a street plan which encourages exploration and discovery of the various shops.

More than 108,000 sq. ft. of PAC-CLAD material in a variety of profiles including 16" Snap-On, 18" High Snap-On, 16" Snap-Clad and 11" Flush Panels were utilized to create the desired look. All material was finished in Custom Literary Green and Weathered Zinc.

The Petersen panels were installed by GNP, Inc., Forney, TX. Design for the project was provided by O'Brien & Associates, Dallas, TX.

Petersen manufactures PAC-CLAD metal cladding products in multiple gauges of steel and aluminum. PAC-CLAD products include standing-seam roof panels, hidden- and exposed-fastener wall panels, flush panels, soffit panels, perforated metal, fascia and coping systems, composite panels, column covers, coil and flat sheet. All are available in full 70% PVDF finish (Kynar) in 46 standard colors that include a 30-year finish warranty. Most colors meet LEED, Energy Star and Cool Roof Rating Council certification requirements. Founded in 1965, Petersen's facilities are located in Illinois, Georgia, Texas, Maryland, Minnesota and Arizona.

For information on the complete line of Petersen metal products call 800-PAC-CLAD, visit pac-clad.com or write to info@pac-clad.com.
