NOTE:
1. Panels should always be lapped against prevailing winds.
2. The above fastening patterns are typical and may not be appropriate for all applications. Consult a Professional Engineer for specific requirements.
3. \( \frac{1}{8} \times \frac{3}{4} \) tape sealant shall be used at all side laps when used as a roof panel.
4. Side lap fasteners are required. Typical spacing is 18"; however, this spacing may not be appropriate for all applications. Consult a Professional Engineer for specific requirements.
5. **DO NOT USE NAILS FOR ANY PANEL ATTACHMENT.**
