NOTE:
1. Panels should always be lapped against prevailing winds.
2. The above fastening patterns are typical and may not be appropriate for all applications. Consult a Professional Engineer for specific requirements.
3. $\frac{1}{8}\text{"} \times \frac{1}{2}\text{"}$ tape sealant shall be used at all side laps when used as a roof panel.
4. Side lap fasteners are required. Typical spacing is 18", however this spacing may not be appropriate for all applications. Consult a Professional Engineer for specific requirements.
5. When using this panel in a roofing application, it should be lapped two corrugations. Panel may be lapped one corrugation when used in a siding application.
6. **DO NOT USE NAILS FOR ANY PANEL ATTACHMENT.**
