

# EQUIPMENT SCREENS

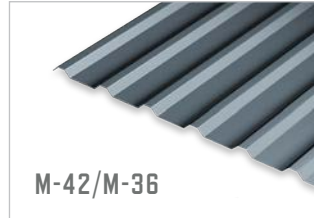

On the ground or on a roof, PAC-CLAD wall panels are ideal for artfully disguising or hiding a building's mechanical equipment. Multiple patterns and styles of PAC-CLAD equipment screen panels are available in 46 standard colors to creatively contain unsightly contraptions. Petersen offers several PAC-CLAD exposed- or hidden-fastener panels that are versatile enough to apply as equipment screens or architectural cladding. Aluminum panels can be perforated in multiple combinations of hole sizes, shapes and open space to allow airflow in and around equipment that requires ventilation.
