Re: Aluminum Price Increase

Aluminum Price Increase

Due to the increase in aluminum ingot costs and continued raw material supply challenges relative to aluminum production, it is necessary that we implement a price increase on the following products effective **February 3, 2025**:

- Aluminum Painted Coil and Flat Sheets: 5%
- Aluminum Mill Finish and Anodized: 5%
- Aluminum Panels: 5%

New pricing will be shared in advance of the increase effective date. To receive pre-increase pricing, orders must be received prior to January 17 and must ship before February 3.

We will continue to monitor the commodity market, and we will be sure to adequately inform you of any future developments or increases.

In closing, we thank you for your continuing business and look forward to working with you on your upcoming architectural metal needs.

Thanks again for your continued support, partnership, and business.

Sincerely,

Mike Weis

Vice President Sales & Marketing
